

Altanna Creek Watershed Study Coralville, Iowa

Client Name: Coralville, Iowa

Contact: Mr. Dan Holderness, City Engineer

Phone: (319) 248-1720

Year Completed: 2006

Responsibilities: Project Manager, Concept Plan Design, Sensitive Areas Mapping.

Watershed planning is an important first step toward **smart growth**. The objectives were to measure changes in the watershed and provide pre- and post-development options for addressing stormwater management.

The study illustrated options for stormwater Best Management Practices, wetland mitigation, and stream restoration. It serves as a road map for development that reduces infrastructure costs and speeds up the environmental permitting process.
