

Brown Deer Golf Course Coralville, Iowa

Client Name: Coralville, Iowa
Contact: Mr. Dan Holderness, City Engineer
Phone: (319) 248-1720
Year Completed: Fall 2004
Responsibilities: Project Manager, Wetland Delineation, Mitigation plans, Joint Permit preparation and review

A portion of Coralville's Brown Deer Golf Course lies in wetlands. Our delineation and mitigation plans have been incorporated into the course's landscape, thus satisfying permit requirements while providing a more challenging experience for golfers.

With a goal of developing sustained wetlands that compensate for areas impacted by development, some of the wetlands are also being used to control storm water runoff from surrounding residential developments. EarthView continues to provide on-going monitoring services.
