

Clear Creek Recreation Trail, Phases II & III Coralville, Iowa

Client Name: Coralville, Iowa

Contact: Mr. Dan Holderness, City Engineer

Phone: (319) 248-1720

Year Completed: Fall 2004

Responsibilities: Project Manager, Wetland Delineation, Mitigation Plans, Joint Permit Preparation and Review, Construction Monitoring, Ongoing Monitoring

The City of Coralville proposed to install a 10-foot wide recreation trail along Clear Creek where it meanders through a forested floodway and floodplain. The area within the construction limits was investigated for potential wetland impacts. Impacts to wetlands were identified and a mitigation plan that included construction of a mitigation site was developed.

EarthView is also responsible for monitoring the site and establishing plantings that are consistent with the type of wetland found in the area.
