Coralville Parks & Recreation Department

Phone: (319) 248-1750

Year Completed: 2004-2007

Responsibilities: Project Manager, Planting Plan, Planting

Area seventh graders come together for a day in the spring to learn about the role of wetlands in protecting water quality in our watersheds. Each year they plant wetland plant species that enhance Coralville's wetland areas.

EarthView coordinates and guides this activity that involves working together in teams, division of labor to attain objectives, identification of plants and their specific growth requirements, and learning how to place the plants in the ground.
